Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Examiner's Detailed Office Action

1. This action is in response to patent application number 09/787,483, filed March 19, 2001.
2. Claims 1,2 and 4-12 have been examined, claim 3 has been cancelled, see preliminary amendment.

Priority

3. Receipt is acknowledged of papers submitted under 35 U.S.C. 119(a)-(d) dated March 19, 2001, paper no. 3, which papers have been placed of record in the file.

Preliminary Amendment

4. Receipt is acknowledged of a preliminary amendment dated March 19, 2001, paper no. 4, which has been placed of record in the file and has been fully considered in light of the outstanding office action.

Claim Rejections - 35 USC § 112

5. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

6. Claims 1,2 and 4-12 are rejected under 35 USC § 112 second paragraph because there is insufficient antecedent basis in the claims.

7. As per claim 1, the phraseology, "the units" in lines, 4, 6, 11, 24 is unclear and indefinite. It is not clear if applicant intended to further include the phraseology "the units" in the preamble

Art Unit: 2121

as part of the “engineering equipment” or not. Evidence that might lead the examiner to believe this is that applicant recites similar phraseology in line 19, namely “a specific unit”, which refers to the engineering equipment. Further, the phraseology, “it” in line 11. It is unclear and ambiguous what applicant refers to while using this language. Clarification is requested.

8. As per claim 5, again applicant has used the phraseology “it” in line 1. It is again unclear and ambiguous what applicant refers to while using this language. Clarification is requested.

Allowable Subject Matter

9. Claims 1,2 and 4-12 are allowable over the prior art of record because the references taken individually or in combination fail to disclose or teach a structured system for monitoring and controlling engineering equipment in an installation wherein the system comprises a central computer module with an input-output device to which control sensors and/or measurement sensors and/or control sensors and control devices for the subassemblies and units of the engineering equipment of the building are connected by the channels of the data network. The system further is provided with controllers connected by a “hierarchical-star” circuit or a bus circuit to the input-output device of the central computer module and remote input-output modules are serially connected to each controller and a corresponding sensor or control device is connected to each of said modules. At least one supplementary computer station is also provided, which is connected via its input-output module to a corresponding software-driven controller responsible for local monitoring and control of subassemblies and units in at least one functionally independent section of the engineering installation of the building.
